EDUCATION

BSc in Software Engineering

Addis Ababa Science and Technology University

- Expected Graduation: 2028
- Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Systems, Operating Systems, Web Development, System Analysis and Modeling, Computer Organization and Architecture.

PROJECTS

Library Management System (HTML5, CSS3, JavaScript, PHP, MySQL, XAMPP)

05/2026 – 06/2025

- **Developed and deployed a full-stack Library Management System** from scratch, streamlining book tracking, user authentication, and administrative workflows.
- Designed and built a **relational MySQL database** hosted via XAMPP to securely store and manage data for books, student records, and borrowing histories.
- Implemented **Role-Based Access Control (RBAC)** in PHP to securely differentiate between standard user views and the administrative dashboard.
- Engineered a comprehensive **Admin CRUD interface**, enabling administrators to efficiently create, read, update, and delete book listings and monitor active loans in real time.

Crime Investigation System (C++, MySQL)

05/2024 – 07/2024

- Developed a **desktop-based application** to help law enforcement record and manage criminal cases, suspects, and evidence.
- Utilized **MySQL** for structured data storage and efficient retrieval of investigation records.
- Implemented **CRUD operations** and role-based access to ensure secure management of data.
- Improved query performance by optimizing database schemas and indexing commonly accessed tables.

SKILLS

- **Programming Languages:** C++, Python, SQL, Java, PHP
- **Web Technologies:** HTML, CSS, JavaScript, React
- **Databases:** MySQL, PostgreSQL (basic)
- **Tools:** Git, Visual Studio Code, MySQL Workbench

CERTIFICATE

- **Responsive web design-freeCodeCamp:** skills: html, css and other responsive web skills in 2025.
- **Volunteer certificate- Google developer group(GDG):** I participated as a volunteer to organize a tech-fest event in AASTU(2025).
